

Gas Ducted Heating

- ✓ Powerful, natural heat
- ✓ Hot no matter what
- ✓ Heating for half price
- ✓ Year round comfort

Brivis Ducted Gas Heating will provide powerful, natural heat for either a whole home or single room solution; you will always feel warm and comfortably no matter how cold it gets outside. Air is drawn from inside your home, rapidly heated, and then gently distributed through ceiling or floor vents. With lower upfront and running costs you will save money while you efficiently and effectively heat your home. Brivis has been warming Australian homes for over 50 years. Our range of highly efficient 5 and 6 Star Ducted Gas Heaters are the result of this experience. For the ultimate home comfort system, go one step further with Brivis Dual Comfort for year round Comfort.

Powerful, Natural Heat

Brivis Ducted Gas Heaters come in a wide range of capacities, ranging from 15kW up to our largest 35kW system. They are also available in various installation configurations, ensuring

there is a system to suit virtually every home. Ducted gas heating is fully adaptable to your needs; systems can heat the largest of family homes and also modulate down to just a single zone. With the use of the unique Brivis ZonePlus control system, you can either set different temperatures in individual zones or achieve a perfect, consistent temperature throughout the entire home.

Hot No Matter What

When it is really cold outside, you want to be confident you will be warm and comfortable inside - that's why Brivis Ducted Gas Heaters are the product of choice in the coldest parts of Australia. No matter what the outside temperature is, a Brivis

Central Heating System	Hourly cost
Gas Ducted - 4 & 5 star rating (zoned*)	12c-18c
Ducted Reverse Cycle Airconditioning (zoned)	30c-42c

*Assumes 50% of the home is not heated. All costs given for homes of 150 m2 with 2.4m ceilings heated to 21°C. Calculations for larger or smaller homes can be estimated proportionately from these figures. The figures came from the costs and have been calculated with Natural Gas @ 1c/MJ and Electricity @ 17c/kWh. The cost of Natural Gas and Electricity will vary depending on your location and energy provider. Source: Sustainability Victoria - resourcesmart.vic.gov.au

Ducted Gas Heater will maintain its heat output and rapidly warm your home and keep it that way - even when outside temperatures drop below 0°C.

Comparatively, at temperatures below 7°C, Reverse Cycle Air Conditioners reduce both their heating capacity and their efficiency, often turning off to defrost ice build up on the outdoor Condensing Unit.

Heating for Half Price

If it is savings that you want, a Brivis Ducted Gas Heater is both cheaper to buy, install and run than a Reverse Cycle Air Conditioning System. Given the same conditions, a 5 Star Gas Ducted Heater will heat your home for around 50% of the cost it takes to run a Ducted Reverse Cycle Air Conditioner.

Brivis – Australia’s leading climate system

Brivis has been delivering heating solutions to Australian homes for the last 50 years. Our products are renowned for their quality, reliability and durability. The Brivis StarPro range of 6 Star heaters are the culmination of this experience and provide the most efficient ducted gas heating for your home. Every aspect of the Brivis range has been designed to make it more powerful, efficient, reliable and unobtrusive.

Year Round Comfort

Not only can your Brivis Ducted Gas Heater keep you warm in winter, but it can also keep you cool in summer, providing year round comfort. Brivis Dual Comfort series incorporates Brivis ICE refrigerated airconditioning, fully integrated with your Brivis Ducted Gas Heater, utilising the same controls to deliver cool, dehumidified air through the same ductwork and outlets.

So now you can have the best fully integrated heating and refrigerated cooling system, all designed and guaranteed to work seamlessly together.
